PRESS RELEASE

## T2 Systems Installs 154 TagMaster Readers for Duke University Parking

*TagMaster AVI readers integrated into the T2 Systems parking management solution at Duke*

**Tacoma, WA | February 12, 2015** — TagMaster North America, Inc., the leading provider of long-range, high performance Radio Frequency Identification (RFID) systems for Automatic Vehicle Identification (AVI), was installed at Duke University in Durham, North Carolina.

T2 Systems, a parking solutions supplier, provided the University with a comprehensive and campus-wide parking system called T2 Flex that

manages parking access and revenue control, permits, enforcement, event parking, and TagMaster's hands-free access control system (model: XT-3).

One-hundred fifty-four (154) TagMaster long-range UHF readers were integrated into T2's unified solution to allow for quick, hands-free vehicle access for students, faculty and staff at more than 50 University parking areas. Drivers with these AVI tags no longer have to stop their vehicles in order to use a proximity tag or keypad. The long-range RFID reader identifies the vehicle's AVI tag as it approaches a gate and T2 Flex verifies the identity, triggering a gate to open for valid tags and denying access to anyone not permitted to park in that lot or garage.

By gathering accurate usage data in the University lots, Parking and Transportation Services are better able to allocate University resources to implement future development and parking options.

**T2 Systems** is a technology-focused parking systems provider with deep roots in the evolving parking industry. This commitment is evident in T2's quality products and services, thought leadership and strong customer relationships. The company's unified parking management and payment solutions provided under the T2 and Digital brands are in use by nearly 1,000 organizations across the US and Canada including universities, cities, towns, hospitals and parking operators.

**TagMaster North America, Inc.** is the leading provider of long-range, high performance Radio Frequency Identification (RFID) solutions for Automated Vehicle Identification (AVI) and rail bound transportation. Convenient and efficient RFID solutions from TagMaster NA can increase security and decrease environmental impact. Seamless integration and reliable performance records are TagMaster North America's distinct hallmarks.
