Press Release

TagMaster North America installs RFID system for Martin Army Medical Center at Fort Benning, Georgia

TagMaster RFID Systems provides secure vehicle parking access for Military and Medical personnel

Tacoma, WA | September 2017 –TagMaster North America, Inc., the leading provider of identification solutions was installed at Martin Army Medical Center for high security parking garage access.

Ensuring secure and efficient vehicle access was essential for military and medical providers at Martin Army Medical Center and part of the new construction and design project issued by the Department of Defense. Data transmission using TagMaster's LR Series readers and tags are highly secure, encrypted and unique. Military and Medical officials needed to be assured that the vehicle tags in circulation could not be intercepted or duplicated in order to maintain OPSEC (operational security) on post or interfere with post security communications.

TagMaster LR Series readers offered Frequency Hopping with selectable channels to prevent interference and with a highly directional RF field, provide precise and immediate verification when identifying vehicle tags. Staff with assigned vehicle tags are now able to securely and reliably gain garage access without needing to stop, roll down their windows and present the tag. TagMaster Identification

Solutions are completely hands-free and provide peace of mind for drivers. "The Tagmaster system was incredibly easy to install. The programming was very user friendly and simple to adjust to our customers very specific needs. Fuller Fire and Safety will definitely be ordering more of this product for our future projects!" - Jason Matheric Senior Technician, Fuller Fire & Safety Equipment, Inc.

Further complimenting the system is TagMaster North America's ACTS Essential standalone software, powered by ArmID, secures the database directly in the reader and triggers the HySecurity barrier arms. The turnkey solution installed for Fort Benning allows medical staff to effectively gain access to their designated parking spots in the most efficient manner possible.

"By deploying TagMaster LR series RFID systems in conjunction with ACTS Essential software, parking operations are able to increase security compliance and have better transparency", noted Ali Khaksar, President of TagMaster North America, Inc. "As security concerns and threats pose issues for access control applications, it becomes more important than ever to choose a proven and reliable solution such as TagMaster".

TagMaster North America, Inc. is the leading provider of Identification Solutions for Automated Vehicle Identification (AVI) and rail bound transportation. Collective technologies provide convenient and reliable platforms for applications throughout the Americas. TagMaster North America's breadth of Identification Solutions are able to increase security, decrease environmental impact and add value to actualize and simplify vehicle access control for a wide array of projects.
