

TagMaster North America and FlashParking Flying High At Aspen Airport

TagMaster NA RFID Identification Solutions & FlashParking Revenue Control Equipment Deployed at Aspen Airport

Tacoma WA, January 2018 – TagMaster North America, Inc the leading provider of identification solutions recently installed high performing TagMaster NA LR-Series 2.45GHz readers in conjunction with FlashParking’s parking access and revenue control equipment for Aspen Airport in Colorado.

Efficient and secure parking controls and access proved to be a challenge for the Aspen airport previously. Due to the extreme weather conditions present in Aspen, the airport needed a durable and reliable system capable of providing consistent performance regardless of adverse and inclement weather often present.

Aspen Airport deployed FlashParking’s Entry/Exit smart stations, cash machines and pay on foot stations in conjunction with TagMaster NA’s IP66 rated LR-Series long range RFID system proven for harsh environments. The new FlashParking touch screen kiosks with cloud technology and TagMaster’s premier microwave RFID technology improved the throughput speeds and effectively eliminated vehicle congestion and queues. Streamlining parking controls increases security, and vehicle throughput is now improved at a critical traffic point, allowing airport parkers to conveniently gain access without the need to stop or roll down a window to present a badge. By choosing TagMaster NA and FlashParking, Aspen Airport maintains reliable oversight while increasing lane availability and maximizing revenue control.

TagMaster is always looking to see how we can provide and partner with reliable solutions that reflect the integrity and design of the products we put forward for airport applications," said Ali Khaksar, President of TagMaster North America, Inc. "Partnering with FlashParking ensures a highly successful project."

"FlashParking is proud to partner with best-of-breed industry technology providers, like TagMaster," said Eliseo Diaz, FlashParking Co-founder and Chief Revenue Officer. "With our PARCS solution coupled with the TagMaster AVI technology, we are confident that Aspen Airport will provide an elevated experience for their guests, while maximizing their operations for years to come."

FlashParking The FlashParking mission is simple: to perfect the parking experience. Whether it’s garage, lot, or valet operations, FlashParking provides a simple, innovative approach to managing parking. Our touch-screen, smart stations, coupled with cloud-run software, enable parking operators and asset owners to increase revenue, while giving guests a better parking experience.
