

## Warehouse and Forklift Access Streamlined with TagMaster NA ACTS ESSENTIAL Standalone Software

*A large distribution warehouse in Texas benefits from TagMaster NA long-range LR-series readers and standalone ACTS ESSENTIAL software*

TACOMA, WA | July 2019 – TagMaster North America, Inc., a leading provider of long-range, high-performance radio frequency identification (RFID) and license plate recognition (LPR) solutions for automatic vehicle identification (AVI), in affiliation with DH Pace Company Inc., deployed a long-range radio frequency identification (RFID) solution for a distribution warehouse in Dallas, Texas.

The warehouse needed a turnkey solution for their high-speed roll-up doors to grant their forklift fleet access into their industrial freezer. In the warehouse, multiple high-speed roll-up doors stand adjacent to each other. Previously, the doors operated using sensors. With the sensor system, the doors would open rapidly whenever vehicles or forklifts drove past, even when they were not trying to gain access to the freezers. To address the warehouse's concerns, TagMaster NA provided LR-series microwave readers and heavy-duty tags, as well as the standalone reader-embedded ACTS Essential software.

The 2.45GHz readers feature a highly defined and directional read lobe, which made installation and configuration easy. Additionally, only vehicles with valid credentials are granted access to each freezer door, and each occasion of access is logged. The embedded ACTS Essential software provides each reader with its own database, logs and reporting capabilities. The heavy-duty tags each have their own unique ID and can be mounted using magnets, so the warehouse can assign each employee their own tag, and employees can move their unique tags from vehicle to vehicle, allowing employee tracking in addition to vehicle access control. With TagMaster NA's RFID system in place, the warehouse has a secure, efficient and easy-to-use system that is durable enough to withstand even the most demanding environments, including industrial and low-temperature environments.

**DH Pace Company, Inc.** is a national leader in the door, dock and security industries. The company offers a complete range of design, installation, maintenance and repair services nationwide for new and existing facilities. Customized solutions designed to meet each customer's unique needs can be delivered on a local, regional or national basis. For more information, visit them at [www.DHPace.com](http://www.DHPace.com).

**TagMaster North America, Inc.** is a leading provider of identification solutions for automated vehicle identification (AVI) and rail-bound transportation. Collective technologies provide convenient and reliable platforms for applications throughout the Americas. TagMaster North America's breadth of identification solutions are able to increase security, decrease environmental impact and add value to actualize and simplify vehicle access control for a wide array of projects.
