

TagMaster NA Provides Turnkey Identification Solution for Employee Parking *TagMaster NA's ACTS Advanced software deployed for hands-free parking*

Tacoma, WA | December 2018 –TagMaster North America, Inc., a leading provider of identification solutions, deployed a comprehensive solution for a prestigious financial institution in Alabama with long-range RFID readers and Access Control Tracking System (ACTS). ACTS Advanced software, powered by ARMID, was installed to provide the performance and security the project required. The financial institution required a secure parking solution that would virtually eliminate tailgating and unauthorized access. The location did not have an existing access control system on-site to manage vehicle identification and entry. TagMaster NA's ARMID ACTS Advanced software, in conjunction with their XT-series UHF readers, offered the ideal solution.

With the installation of TMNA's turnkey access control system, the financial institution now has access to the user-friendly ACTS Advanced interface, which offers premium features such as zoning, multiple-reader support, sync-enabled whitelisting, easy-to-organize access groups and profiles, and customizable event reporting. ACTS Advanced software easily monitors and controls all inbound traffic, offering the financial institution increased security. The reliable RFID readers provide hands-free convenience for users and increased throughput speeds, reducing traffic congestion and increasing security.

TMNA provides state-of-the-art vehicle access control with comprehensive, reliable and modern software solutions that can be customized to suit the unique specifications of a wide variety of projects, communicating via TCP/IP.

TagMaster North America, Inc. is a leading provider of identification solutions for automated vehicle identification (AVI) and rail bound transportation. Collective technologies provide convenient and reliable platforms for applications throughout the Americas. TagMaster North America's breadth of identification solutions are able to increase security, decrease environmental impact and add value to actualize and simplify vehicle access control for a wide array of projects.
