

ACTS ESSENTIAL and XT-5 UHF Reader Provide All-In-One Access Control Solution

Embracing the new normal after COVID-19 with cost effective and contactless AVI

Tacoma, WA | May 2020 – TagMaster North America, Inc. a leading provider of intelligent identification and mobility solutions announces the new and improved ACTS ESSENTIAL all-in-one software. When embedded in our PoE+ enabled XT-5 UHF reader the entire system can be managed with one Ethernet cable. This easy to install solution can be accessed and managed anywhere, anytime using any popular web browser. Because ACTS ESSENTIAL software is embedded into the XT-5 reader there is no need for any external hardware or software, the entire access control system is contained within the small hardware footprint of the XT-5 RFID reader itself.

Remote access and management have never been easier with the convenient web based interface. Users can manage credentials, create schedules, and view the real time event log from any authorized device. With the reader and software accessible via your remote device, technicians do not need to be dispatched physically to the site and adjustments can be made from the safety of the office or home.

TagMaster NA continues to earn its position as an industry leader by leveraging an innovative product line and in house development to respond to the ever-evolving and changing industry standards. As customers

now demand higher security but with a contactless approach, our ACTS ESSENTIAL software and XT-5 UHF reader provide a clear solution only available from TagMaster NA. For future integration of a larger scale access control or parking revenue control system, the reader can easily be switched to one of our industry standard built-in interfaces (Wiegand, RS232, RS485 and TCP/IP) via dual booting to ensure a lasting and future-ready solution.

- ✓Supports up to 2 long range RFID readers
- ✓POE+ Enabled
- ✓Reader embedded = no additional access control panel hardware
- ✓Anti-passback capabilities with the exit reader
- ✓Complete standalone access control solution
- ✓Reporting and scheduling capabilities
- ✓Remote access from any authorized device
