

The cutting edge CT-45 camera is welcomed into the TagMaster family

Tacoma, WA | October 2020 – TagMaster North America, Inc., a leading provider of advanced identification and mobility solutions announces the launch of the TagMaster LPR CT-45 camera for deployment. TagMaster has been in business globally since 1994 with over 25 years of technical knowledge and experience in the industries we serve.

This cost-effective intelligent IP-based LPR camera is designed specifically for the demands of the North American market. TagMaster NA's current offering of intelligent cameras make the launch of the new CT-45 camera a perfect fit for those looking to have it all.

New features like PoE+, a Linux operating system, onboard OCR Engine and LPR processing with color and infrared images ensure incredible performance and scalability. The powerful onboard OCR engine boasts the fastest and most accurate algorithms for reading license plates from every region and state. The new CT-45 camera has been developed through extensive and cooperative collaboration between TagMaster technical teams and valuable input from our existing partners in the parking, security, and industrial markets.

“We are pleased to add the CT-45 LPR camera to our product line, and confident in the many benefits it can provide our partners,” Ali Khaksar, President of TagMaster North America states, “We are looking forward to providing cutting edge solutions based on the current and growing market demands with LPR technology.”

TagMaster North America, Inc. is a leading provider of identification solutions for automated vehicle identification (AVI) and rail-bound transportation. Collective technologies provide convenient and reliable platforms for applications throughout the Americas. TagMaster North America's breadth of identification solutions are able to increase security, decrease environmental impact and add value to actualize and simplify vehicle access control for a wide array of projects.
