

Torre Virreyes chooses TagMaster NA and SKIDATA Mexico

Prestigious high-rise deploys TagMaster NA and SKIDATA MX for Parking Access and Revenue Control (PARCS)

Tacoma, WA | March 2018 – TagMaster North America, Inc., a leading provider of Identification Solutions recently installed high performing LR-Series Microwave readers in conjunction with SKIDATA parking control barriers and Easy Cash stations to provide parking access and revenue control for a high end office building in Mexico City.

Torre Virreyes needed a secure parking access and revenue control system that was able to not only maximize revenue and throughput speeds but also read through bullet proof glass installed throughout the armored vehicles accessing the facility.

TagMaster NA Microwave RFID platform is able to consistently read through armored vehicles and bullet proof glass, increasing critical security for the facility. Throughput speeds have increased and traffic congestion reduced. The solution put forward by TagMaster North America and SKIDATA Mexico was able to streamline overall parking

operations. Torre Virreyes now has a secure, reliable and modern comprehensive access control solution. This solution has significantly improved the parking experience and security for parking patrons.

SKIDATA MEXICO is an international leading company for access solutions and management. More than 10,000 SKIDATA installations in ski resorts, shopping centers, major airports, communities, sports stadiums, exhibition centers and amusement parks worldwide ensure safe and reliable access control for people and vehicles. SKIDATA places great value in offering solutions that are intuitive, easy to operate and secure. With their integrated concepts, SKIDATA solutions help clients optimize performance and maximize profits.
